

CORNERCARE STOP BEADS

Cornercare Stop Bead profile provides the ideal answer to finishing the edges of plaster/render work. The straight edge of the profile ensures an accurate finish line whilst protecting the plaster where it is most vulnerable.

INTERNAL PLASTERING

Galvanised Stop Beads are for use when plastering internally; manufactured to BS EN 13658 : Part 1 & 2 : 2005 from Galvanised Steel to BS EN 10346 : 2009 DX51D + Z275.

EXTERNAL RENDERING

Stainless Steel Beads are recommended for use when applying an external render, polymer modified finishes or a sand cement finish.

The Stainless Steel beads meet with the requirements of BS EN 13658 : Part 1 & 2 : 2005.

All Stainless Steel beads are manufactured from BS EN 10088 - 4 grade 1.4301.

FIXING ADVICE

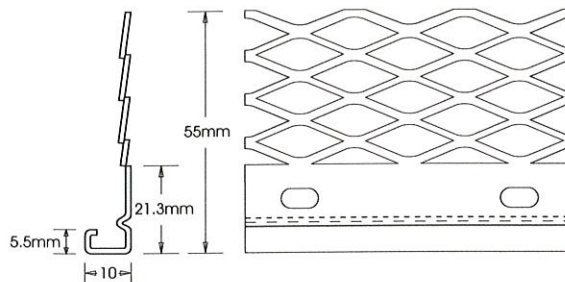

Please ensure when fixing Stainless Steel Beads that Galvanised Nails are not used as this will lead to rust spots.

COSHH CERTIFICATION

Copy data can be downloaded with product illustrations from our website.
